

NISHANT AGRAWAL

Jodhpur, Rajasthan, India | +91-7727972916 | nishantagrawal2003@gmail.com | linkedin.com/in/nishant-agrawal-47b19321a | github.com/Ash0069

PROFESSIONAL SUMMARY

Results-driven full-stack engineer and AI operations specialist with a strong foundation in React/Next.js, Tailwind CSS, Django, FastAPI, and RESTful API architecture for high-stakes production environments. Experienced in building and deploying agentic AI systems and designing scalable AI agent workflows to automate complex tasks and enhance decision-making processes. Demonstrated ability to streamline document-processing pipelines, craft performant relational databases, and lead cross-functional engineering teams toward measurable outcomes. Proficient in CI/CD, PostgreSQL, Redis, LLM integration, and Claude Code, with a focus on delivering robust, production-grade solutions for modern software systems.

WORK EXPERIENCE

Amari AI

Operations Manager

Remote

Jun 2025 – Present

- Spearheaded end-to-end oversight of AI-driven document processing pipelines for international customs clearance, guaranteeing precise and punctual completion of high-volume global transactions.
- Architected a production-grade FastAPI RESTful API that empowered operations scripts to execute autonomously, eliminating manual hand-offs and slashing inter-team bottlenecks by a significant margin.
- Engineered a centralized PostgreSQL database for customs entry records, accelerating average entry processing time by 35% and enhancing end-to-end shipment traceability.
- Investigated and remediated critical AI output anomalies through FastAPI-based operator tooling, sustaining 99%+ uptime across mission-critical document workflows.
- Accelerated log rendering performance by strategically capping DOM element counts, trimming CPU and RAM consumption by 80% on client-facing systems.
- Orchestrated transparent cross-functional communication via integrated email channels, swiftly escalating incidents and driving resolution across globally distributed operations and engineering squads.

Raniac

Director of Frontend Development

Remote

Feb 2025 – Jun 2025

- Championed technical excellence across a high-performing frontend engineering squad, establishing coding standards, conducting rigorous code reviews, and enforcing best practices in performance, accessibility, and long-term scalability.
- Served as the authoritative liaison between executive stakeholders and delivery teams, providing transparent updates on milestones, risks, and outcomes across several simultaneous client engagements.
- Orchestrated agile sprint planning and equitable workload distribution, consistently hitting ambitious release targets without compromising output quality.

Orange Business Service

Software Engineer Intern

Gurugram, Haryana

Sep 2023 – Dec 2023

- Partnered with cross-functional colleagues to revamp the customer mapping and locking tool for the IACA project, propelling user engagement and satisfaction scores upward by 15%.
- Conceived and launched an automated SMTP notification pipeline that slashed manual communication overhead by 50% while lifting user engagement by an additional 20%.
- Fortified API reliability through comprehensive Postman-driven validation and automated regression scripts, tightening security posture and cutting testing cycle time by 25%.

EDUCATION

Vellore Institute of Technology, Vellore

Bachelor of Technology

Vellore, Tamil Nadu

Graduated: May 2025

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

PROJECTS

DEX — Next.js, Tailwind CSS, Django

- Spearheaded frontend architecture for DEX, a robust academic platform equipping professors with intuitive tools for administering tests, curating student records, and distributing course materials.
- Crafted adaptive, responsive UI components with Tailwind CSS covering test creation, intelligent scheduling, automated grading, and real-time alerts; assembled comprehensive professor dashboards for class oversight and performance analytics.

Aurexa E-commerce — Next.js, Tailwind CSS, Django, PostgreSQL, GitHub Actions

- Constructed a scalable, full-stack e-commerce solution pairing a dynamic Next.js + Tailwind CSS storefront with a Django REST backend and PostgreSQL for reliable data persistence across 5 diverse product categories.
- Achieved seamless zero-downtime production releases by deploying on Railway and Render, underpinned by an automated CI/CD pipeline via GitHub Actions.

AI Customer Support Dashboard — Next.js, Tailwind CSS, Node.js, Mistral AI, TursoDB

- Assembled a sophisticated AI-powered customer intelligence dashboard in Next.js (TypeScript) styled with Tailwind CSS, prioritising a modular, component-driven architecture primed for long-term extensibility.
- Forged a high-performance Node.js backend harnessing Mistral AI for instant automated replies, contextual summaries, and actionable insights; paired with edge-optimised TursoDB for ultra-low-latency data retrieval.

FastAudit — Python

- Conceived and shipped FastAudit, an automated pre-deployment auditing framework that rigorously validates Django applications for production readiness — spanning security hardening, environment configuration, database integrity, CORS policy, debug-mode checks, and static asset setup.
- Structured an extensible, plugin-friendly audit engine with a clear roadmap for expanding coverage to FastAPI, Node.js, and Next.js ecosystems.

SKILLS

Languages: Python, TypeScript, JavaScript, HTML, CSS, SQL

Frameworks & Libraries: React, Next.js, Tailwind CSS, Django, FastAPI, Node.js

Databases & Infrastructure: PostgreSQL, Redis, Firebase, Docker, Git, GitHub Actions, CI/CD, REST APIs, AWS, Jenkins

AI & Developer Tools: LLM Integration, Mistral AI, Prompt Engineering, Claude Code

Testing & Tooling: Postman, Automated Testing, FastAPI Operator Tools
